Are you seeking extra monthly income?

I am looking for people to help me grow my business.

All you need is a smartphone, the internet, and Facebook... And maybe also a power bank, so you can work from anywhere.

All you have to do is post on facebook to earn.

It's not a job. It's a business you can do online.

The best part is, you don't have to pay anything to start!

I am organizing sharing sessions near the Dhoby Ghaut MRT Station (Singapore) to show you how it works.

Would you like to attend?

If yes, message me on facebook <http://fb.com/AdrianLeeYC>.

Also, look out for my emails on other ways I make extra income.

If an additional \$500 per month makes a difference to your overall income, then this is for you.

A handwritten signature in black ink that reads "Adrian". The signature is stylized with a long horizontal line extending to the left and right.

1 - Is it Possible to Make an Extra \$500 Per Month Legitimately?

Starting an internet home business that is legitimate can be hard to find especially in the online world.

Making an extra \$500 per month may seem impossible on the internet, but many are making that type of revenue and more each and everyday.

Skepticism is quite normal in this type of situation, however there are a few things you can do today to ensure you find the right business opportunity just for you.

1. **Research and More Research** - This is where you are going to spend most of your time. Most people make the mistake of joining a business without checking it out thoroughly, and in the end, thousands of dollars are lost. Don't make the same mistake that I did years ago. Make sure you don't fall into this trap. Use the internet, other people, and classifieds to check out all the components before joining a internet based home business.
2. **Social Networking Spots** - Become proactive in social networking sites like Facebook and Twitter. These are the probably the best places on the internet to ask questions and get advice before jumping into any business. Connect with people of integrity and stay away from those who just want to take your money.
3. **Have Faith** - In the end, once you have made your mind up on the internet home business you have decided to join, have faith that you will succeed. And more importantly, have the right attitude that you made the right decision for you and your family. Be prepared to receive all the training you need to be successful.

Now, if you have joined a legitimate opportunity online, be prepared to make the extra \$500 or more you set out to accomplish in the first place.

2 - Quick & Easy Way to Build a Blog That Earns \$500+ Per Month!

What if you could build a mini-site or blog that made you \$500 a month or more in your first year?

What if you could build 10 sites that did the same thing?

That would be \$5000 a month.

As you study every word of this article, you will be amazed at what you'll learn.

Listen closely, a good friend of mine asked me a bizarre question the other day that directly relates to this:

"If you were in the restaurant business and you wanted to fill up your restaurant with paying customers, what would you do?"

Well, I came up with things like cook a great meal, make it look very appetizing, cook specialty foods - my list went on and on.

He kept shaking his head NO, and finally I just asked him.

He laughed and replied: "You've got to find a starving crowd. Period."

You don't realize it yet, but in the next 2 minutes you're going to learn the secrets to building a money-making mini-site or blog from scratch in a niche where people are eager to buy your products or services.

You will know what the one thing alone has caused many an Internet marketer no end of stress.

Those who master this simple concept and can act upon it correctly, make money whether they are selling their own product or other people's product.

By the time you finish reading this article, you'll will have learned secrets that have taken other marketers years to figure out.

Forget everything and listen. Great niches are areas where people have problems and are looking for solutions.

Problems are painful, whether you are talking about physical, financial or emotional pain. By offering a solution, you get people out of pain, and if you do it via a mini-site or website, you will make sales.

Are You Exploiting People This Way?

The answer is a resounding NO!

Now listen closely! While it may sound a bit sickening at first glance, think again; you are actually providing a valuable service.

You are giving these people a way out of pain. It's called Internet marketing, and before that, it was just plain marketing.

People have been marketing to you all your life. They have offered solutions to all kinds of problems you have experienced be it weight loss or finding the perfect date.

So, what you are doing is providing people with a real solution, and they will thank you in the end for getting them out of their dilemma.

Although you are looking for a starving crowd otherwise known as a group of people with a specific problem, that's not all there is to it.

You should next focus on the number of people with your niche-specific problem.

You want to help folks out, but you also want to have a good idea of how many people are out there with a predicament.

So, how many is enough to produce a product, you ask? Well, it really depends on the solution you're offering.

Pay close attention! On some sites, all you need is 10 visitors to your site per day to make a nice profit from your solution.

On other sites, you may need to go for volume in that you need thousands of visitors per day to become profitable.

What you will need to do is figure out what you want to sell, who you want to sell it to AND the amount of commissions or profit you will make from selling the product.

Here's a secret: Because of this need for knowledge, you should also do some research on search volume using a keyword tool.

What you do is simply type in a keyword that best represents what you're selling. It will show you how many searches per day happen on a particular keyword.

It will also show you other keywords and search volumes so that you can get an idea of how to reword you sales points to increase visitors.

After that, you will want to look at other sites that you are competing with in the same niche.

Pull up a chair and hear me out: Contrary to popular belief, you do want some competition.

Think about it. When you drive by a restaurant on the road, if you see no cars in the parking lot, do you stop?

Your first thought may be that the food is probably lousy, because they have no customers. By the same token, when you see too many cars in the parking lot, you figure it will take a lot of time to get a seat so you may drive on past.

It's the same with product sales. If nobody is selling it, and it's been around for a while, it might not be a profitable niche. If everyone and their brother is selling the same product, you won't be seen amidst the rushes.

You are ready for success, aren't you?

Get Really Excited: What you want to look for is niches that get SOME traffic. You will want the competition to be low, so that you can make your site a better site providing a better solution and more information for your visitors. In this way, you will zoom past the competition and begin to turn a profit.

Listen closely: What you are going to want to do is find a good niche that offers a quality product that you can promote with pride. It should have marketing material like a sales letter that will help convert tire-kickers into customers, and it should pay a decent commission.

This example assumes that you are doing affiliate marketing which is selling other people's products for a commission.

Your income could come from personal product sales and other monetization tools as well, but the principle is the same.

If you want to build to a full-time income from your blog or mini-site, you will need to work on writing articles and blog posts that will give you links back to your website. This is a sure-fire method of increasing visitors.

As well, you will want to look into other methods of monetization of your site, and if you have decided to build more than one website, you will want a way to keep them organized and up-to-date.

STOP and think of all the ways you can use this information to get what you want. If you combine all of these components when you select your niche, you will be head-and-shoulders above your competition and on the road to success.

Imagine, you are now living five years from now. You've been making mini-sites and blogs and making money.

Where will you be?

3 - Network Marketing - An Easy Way to Earn An Extra \$500 A Month?

Many people, likely including you, could make good use of an extra \$500 per month in income.

As a matter of fact, there are ways that average people accumulate above average wealth.

One of the strategies to to be involved in a network marketing home based business opportunity and to use other investment options.

You see, earning an extra \$500 per month isn't rocket science since ordinary people like you have made not only an extra \$500 per month but have become millionaires.

Plus, they did not do this by winning the mega millions lottery or by reaping a sudden windfall.

Let's take a look at the top two ways to get an extra \$500 per month.

1. **Have your money work for you.** If you have your money in places like investment funds, real-estate, or in a bank savings account that accumulates interest, your money is working for you 24 hours a day. If you have a substantial amount invested, the monthly interest and dividends can match or even exceed your job income.

You probably are thinking that all sounds well and good, but where does the money come from to invest in resources like these?

The truth is, there are options such as :

- *owning your own network marketing internet home-based business as a part-time business

- *a part-time job

- *having a Financial Advisor arrange your finances to that you pay less in taxes

- *reducing personal expenses

While all these methods might look small, overtime they can help you tremendously accumulate the investment money you need.

2. **You can have other people work for you.** If you look around, you will notice that there are many business owners. They, like you and I, only have 24 hours in a day. However, they understand what the world "leverage" is all about. They leverage their business time and effort through other people. Business owners earn a little bit from their employee's efforts and this adds up over time.

You might be thinking that since you do not operate a business with employees, you

can't use leverage. You also might be thinking there is no way you'd want a business with tons of overhead and employee headaches. The truth is, you can use leverage without owning a business where you have to employ people.

How? With a network marketing home based business opportunity.

Do you realize you use network marketing everyday? All it is, is recommending and promoting what you like. I'm sure you recommend and promote things like: *places to shop *movies *restaurants *vacation destinations *car mechanics *doctors... We could go on and on.

Since you already do this, why not get paid for it instead of doing it for free?

Network marketing companies not only pay you to tell others, but also when the people you tell, share with others. This goes on and on plus you earn money each month for this. This is simply people leveraging at work.

In summary, there are three primary ways you can earn an extra \$500 paycheck per month:

- *work a job for a monthly paycheck
- *have your money work for you
- *have other people work for you

In order to accelerate the means to have your money work for you, to have other people work for you, and to obtain financial independence and retirement sooner rather than later, one of the best ways is by starting a network marketing home-based business opportunity.

This truly is one of the fastest ways to retirement plus get an extra \$500 per month! Don't you think it is worthwhile to check out?

4 - How to Earn Extra \$200 to \$500 Online Without Investing?

We all know that we are all financially challenged with the current economic status, and as much as we want to work with companies and businesses, there is not enough employment available for everyone.

Now with the advent of internet business, which promises good enough money, many people have flocked the World Wide Web.

However, do you know how to earn money online without investing a big amount of money?

Yes, you can now start making money without investing your savings.

You can start earning money through article marketing. By simply writing articles for clients, you can earn as much as \$200 to \$300 per month. Yes, that is money for individuals that love to write and is good with English. There are many clients looking for web content to promote their products and services. If you really want to make that easy money, go with Article Marketing.

Another way to earn money online is through web designing and web maintenance. There are a lot of clients looking for a way to manage their websites. That is why they are hiring a lot of technical and creative people in this area. Clients offer \$300 to \$750 for tasks like these, a very high paying job.

Being a virtual assistant is also another job worth taking. If you are a skilled writer and also have knowledge with basic internet applications such as HTML, programming and posting site, this will be ideal for you. VA's usually earn around \$300-\$500 per month. With the flexibility of your job, you could also gain other skills you can use in other online jobs.

How to earn money online without investing any money? You have the answers already.

The internet already provides us ways to earn great pay without having us to spend hundreds of dollars.

You know you will be successful if you start investing your time to learn the skills you need and apply it.

5 - How to Make \$500 a Month Online With ClickBank

Chances are if you're reading this, you're looking for ways to make money online.

Consider yourself lucky because today I'm going to share with you a proven method that allows anyone to make at least \$500 a month working online.

Now the good thing is I'm going to show you exactly how to make this money without spending any money in advertising.

The way I'm going to show you how to make money will deal with affiliate marketing, and using the help of a free service called ClickBank.

First let's go over what exactly affiliate marketing is, and how it can help you make money.

Affiliate marketing is simply selling someone's product, and in return they pay you a small commission for making a sale.

Depending on the type of product you sell, the commission you can make can range anywhere from a couple of dollars all the way to a few hundred.

Now the free service you will use to find products to promote is Clickbank.

ClickBank has been around for a very long time and has a very good reputation of paying people on time.

You can visit their website and search the marketplace for a product to promote.

I suggest you pick a product that you like and feel good about promoting.

It also doesn't hurt to already know a little bit about what you are promoting.

After you pick your product from the ClickBank marketplace, the fun now begins.

Now we will start to focus on how to start advertising this product to those who need it.

First off you must understand that not everyone is going to need or want your product.

So you need to find what is called your target audience.

A target audience will be a specific group of people who need or want what you are selling. These are red hot buyers.

For marketing your product, I suggest starting off by doing a little article marketing.

You should write reviews of the product, and other articles that just talk in general about what the product is and how it might help someone.

With article marketing, you should make it a goal of yours to write 3 to 5 articles per week and submit them to the top article directories.

Make sure that when you do submit your articles for your ClickBank product, you leave a link back to your website you are using to promote your product.

Finally our last proven method of free online marketing for your click bank product is social networking sites.

Social network sites are where people go to meet and make friends, but they are also used to sell things online, and it's a proven method that works.

Create a Facebook account. Once you have your account make your profile page talk about how you work online, and what you've done in the past.

As you do this leave links back to your websites, and maybe even recommend a product to people.

The most important thing though is you do not want to turn your profile into a sales page. Just give them enough information so they click the links on your page.

This method works extremely well. One of the main keys to making it work though is building up friends. The more friends you have the more people will see your profile page, which leads to more clicks.

So there you have it.

This is a proven way to make \$500 or more per month promoting a Clickbank product.

If you wish to make more money all you have to do is pick another product and repeat the same steps above for your new product.

Thanks for reading.

Are you seriously seeking extra monthly income?

Do you have a smartphone, Internet and Facebook?

All you have to do is post on facebook to earn.

It's not a job. It's a business you can do online.

The best part is, you don't have to pay anything to start!

I am organizing sharing sessions near the Dhoby Ghaut MRT Station (Singapore) to show you how it works.

Would you like to attend?

Again, if yes, message me on facebook <http://fb.com/AdrianLeeYC>.

Also, look out for my emails on other ways I make extra income.

If an additional \$500 per month makes a difference to your overall income, then this is for you.
